Shenyang Crystal International Foreign  
Businessman Apartment

对于城市中心突兀而起的一座建筑之林，最大小小的洞口将建筑与大自然交流和呼吸，采光是主动的制造，于是大玻璃幕墙或窗字有与之前的大气的结构，通风也是制造，于是上述的平开的开敞的私密的各种需求集于一身，彼此融合了。  
For a kit of buildings suddenly rising in the center of the city, the holes in the buildings whether big or small are all begin to communicate and breathe with the nature. Natural lighting is the most important thing to concern. So the big glass and well penetrating requirement must be matched with the great construction. Ventilation is also an important factor. So top-suspended, lum opening, public and social need to get together. Light make it.
